

The New CCNA Concentrations

CCNA Security • CCNA Voice • CCNA Wireless

Recent studies show that most companies expect that dedicated IT security, voice, and wireless networking roles will exist within their organizations in the next five years. In response to this and other trends, Cisco has announced major additions to their associate-level certification program. Three new concentrations will allow professionals to build upon their active CCNA certifications and take steps forward with their careers in security, voice, and wireless networking.

CCNA Security

What it validates

- Your skills in installing, troubleshooting, and monitoring Cisco security technologies
- Your ability to develop security policies and mitigate risk in networks

Prepares you for the following job roles

- Network Security Specialist
- Security Administrator
- Network Security Support Engineer

Required Exam: IINS 640-453

Serves as a prerequisite for CCSP Certification

CCNA Voice

What it validates

- Your skills in voice applications and infrastructure concepts
- Your capabilities in baseline installation, configuration, and maintenance tasks on Cisco VoIP solutions

Prepares you for the following job roles

- Voice Administrator
- Voice Engineer
- Voice Manager

Required Exam: IIUC 640-460

Serves as a prerequisite for CCVP Certification

CCNA Wireless

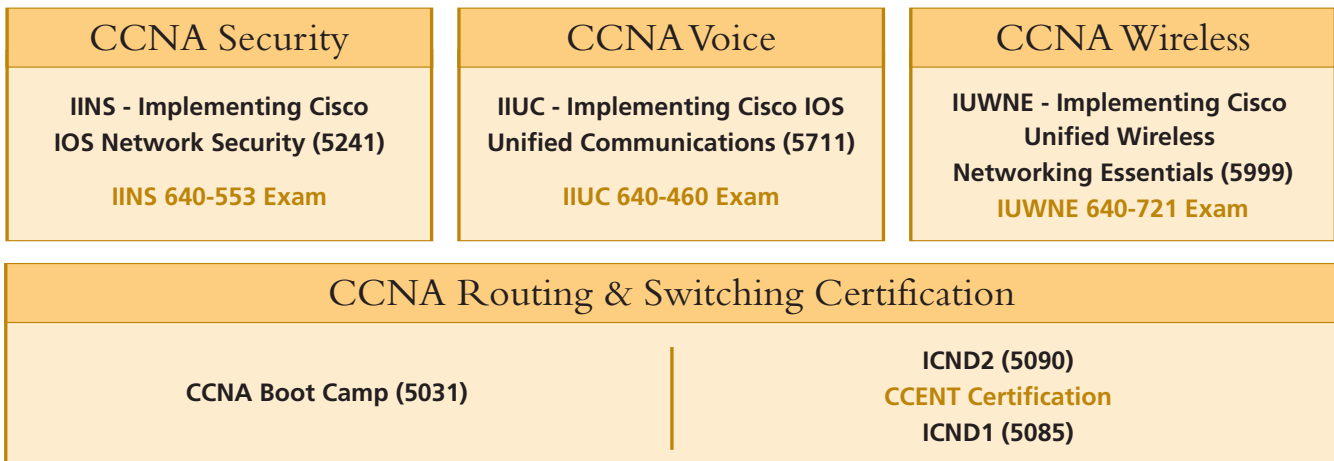

What it validates

- Your ability to configure, implement, and support wireless LANs utilizing Cisco equipment
- Your proficiency in installing, configuring, monitoring, and troubleshooting Cisco WLANs in both SMBs and larger enterprises

Prepares you for the following job roles

- Network Administrator
- Wireless Technician
- Support Technician
- Wireless Network Security Engineer
- WLAN Project Manager
- Wireless Support Specialist

Required Exam: IUWNE 640-721

Obtaining the CCNA Certification

Prior to pursuing one of the new CCNA concentrations, you must first hold an active CCNA certification. This certification can be obtained by passing either the 640-802 CCNA composite exam or by passing the 640-822 ICND1 and 640-816 ICND2 exams. We offer Boot Camps that can help you prepare for these exams.

Prepare for the 640-802 CCNA Composite Exam

[CCNA Boot Camp v2.0, Course 5031](#)

Our *CCNA Boot Camp* is designed to help you achieve your CCNA certification in the shortest period of time possible. To ensure that you get comprehensive coverage of the CCNA materials, our three-step approach to the *CCNA Boot Camp* consists of pre-class activities, classroom instruction, and post-class lab practice. Students who take our *CCNA Boot Camp* will receive a free CCNA 640-802 exam voucher and the Global Knowledge Guarantee.

Prepare for the 604-822 ICND1 and 640-816 ICND2 Exams

[ICND1 – Interconnecting Cisco Network Devices 1, Course 5085](#)

Our exclusive, comprehensive Authorized Cisco *ICND1* training course prepares you for Cisco ICND1 Exam 640-822. Learn the commands and techniques used to troubleshoot host connections, interact with Cisco switches and routers, back up and restore configuration files, and manage network equipment. Students attending our *ICND1* course receive a free exam voucher and the Global Knowledge Guarantee.

[ICND2 – Interconnecting Cisco Network Devices 2, Course 5090](#)

After completing *ICND1*, our enhanced *ICND2* training course is the next step toward earning your CCNA certification. This hands-on course not only prepares you for Cisco ICND2 Exam 640-816 but also enables you to solve complex, real-world switching and routing issues. Attend our Cisco *ICND2* course and receive a free exam voucher with the Global Knowledge Guarantee.

Obtaining the CCNA Concentrations

If you already hold an active CCNA certification, we can help you achieve the new concentrations through our following courses that will help prepare you for the concentration exams.

CCNA Security Concentration

[IINS – Implementing Cisco IOS Network Security, Course 5241](#)

In this course, you'll focus on the necessity of a comprehensive security policy and how it affects the posture of the network. You will learn to perform basic tasks to secure a small branch type office network using Cisco IOS security features available through web-based GUIs (Cisco Router and Security Device Manager [SDM]) and the command-line interface (CLI) on the Cisco routers and switches. This course will help prepare you for the IINS 640-453 exam.

CCNA Voice Concentration

[IIUC - Implementing Cisco IOS Unified Communications, Course 5711](#)

Gain the skills and knowledge necessary to implement a Cisco IOS Unified Communications solution. You will learn the basics of traditional telephony as well as Voice over IP (VoIP) fundamentals, including various VoIP protocols. Learn how to configure Cisco Unified Communications Manager Express (CUCME) and implement and troubleshoot Cisco Unity Express (CUE). You will also explore the configuration of the Cisco Smart Business Communications System (UC500 Series). This course will help prepare you for the IIUC 640-460 exam.

CCNA Wireless Concentration

[IUWNE – Implementing Cisco Unified Wireless Networking Essentials, Course 5999](#)

This hands-on course utilizes labs to teach you all about the designing, installing, configuring, monitoring, and basic troubleshooting tasks of a Cisco WLAN in both small and medium-sized businesses (SMBs) and enterprise installations. It will help prepare you for the IUWNE 640-721 exam.
